

## 1-Port 10/100/1000Mbps High Power PoE Midspan Injector

PSE102-GE-60W

### Key Features:

**Ports:** Provide 2\*10/100/1000Mbps Ethernet ports

**PoE Standard:** IEEE802.3af/at/bt Power over Ethernet (PoE) Compliant

**Total Power:** Total power budget of 65W for all single PoE ports

**Self-adaption:** RJ45 port supports 10/100/1000Mbps Auto MDI/MDIX

**Wide Application:** Designed for Wifi AP and IP Security camera. VoIP etc

**Surge protection:** Protect the device from lightning surges and others electrical hazards

**Considerate Design:** Exquisite compact size. wall mounted with fanless design

**Easy to use:** Plug and play, No configuration required

### Advanced 802.3bt PoE Network Solution

This high power Ultra PoE midspan Injector is a Single-Port, 802.3bt Power over Ethernet Injector with a maximum of up to 95 watts of power output over Ethernet cables. It is designed specifically to meet the demand for growing higher power required network equipment such as:

PTZ speed dome camera

All-in-one touch PC

Remote digital signage display

Other network devices that need higher power to work normally

### All-in-One and Compact-size Design

With concepts of "Easy to install", "Plug and Play" and "Simple troubleshooting" for business and home users, the PoE injector is an all-in-one, single-port PoE+ injector with internal power supply. In the compact size housing and it provides one 100-240V AC input socket on its front panel, two LEDs (System POWER and PoE ACTIVE ) on the top side and two RJ45 ports (POE port and LAN port) on the rear panel. Simply plug in the Ethernet cables and power cord, It is ready to provide high-speed network communication and high power PoE+ injector functions simultaneously with no need of software configuration.

### Quick and Easy Cabling Installation for PoE Network Deployment

Complying with both 802.3af and 802.3at PoE+ standards, the POE Injector allows users to flexibly deploy standard and high powered devices to transfer data and power simultaneously through one Ethernet cable for up to 100 meters. It also frees the security IP camera and wireless AP deployment from restrictions of power outlet locations and the additional AC wiring. It thus reduces cables and eliminates the need for electrical outlets on the wall, ceiling or any unreachable place, and most of all, it reduces installation time
