Introduction

This FMC-100 series media converter extends network distance with highly performance via fiber optic cable. It provides media conversion between 10/100BASE-T and 100BASE-SX/LX interfaces. There are SC/SFP/WDM connectors with single-mode or multi-mode media for different distance solution as required. The Ethernet signal allows three types of segments to connect easily, efficiently and inexpensively. As this Media Converter fully complies with IEEE 802.3 10BASE-T, IEEE 802.3u 100BASE-TX, the media conversion installation is quite quick and easy with its plug and play feature. The FMC-100 also supports flow control and back pressure in half-duplex to eliminate packet loss.

The fiber port of the converter operates at 1310 /1550nm with SC connectors. Multi-mode models that support distances up to 2km and single-mode models that support distances up to 100km more are available which it can save more installation..

High Performance and Steady Network Communications

Distance Extension with Benchu Group fiber media converter series extends communication distance with highly performance via fiber optic cable. The FMC-100 series Fiber converter series provides media conversion between 10/100BASE-T and 100BASE-SX/LX interfaces such as multi-mode LC/SC connectors (220m / 550m), single-mode LC/SC connectors (10/20/30/40/50/70/120km) and single fiber connectors (WDM, 15/60km) for various fiber optic applications.
